

Continuances

- Judge Brailsford is generally receptive to an initial request for the continuance of a trial setting by the defendant.
- A request for further continuances will be closely scrutinized and may well be denied.
- Requests for continuance should be supported by an affidavit and should set forth facts from which the Court can conclude whether the requested continuance would support a finding of excludible time under the Speedy Trial Act.
- The motion and supporting affidavit must be docketed on CM/ECF.
